3/1/75

Dear Ian,

Amused at Copeland's bit I am. But also more. Many thanks.

If you see anything more like it, I sure would appreciate it.

The CIA has a special language. In it Copeland was not an "agent." As you and I understand the word, of course he was.

3/8 is the annual Hyattstown firemens supper. We'll probably go, with Bill's ma getting tickets in advance for us so we won't have the line to sweat out. Think you'd like to?

It is possible Martin Waldron will be here then. I won't know until Friday, when he is to phone me.

McRae merely went through the motions to validate a preconception in which the law and fact were immaterial.

We'll appeal, with vigor. I haven't seen the decision yet but it is permeated with errors of fact, miscitations, citations of the non-existent and plain lying.

I haven't seen the decision yet.

Our best,
